1...2...3...26...40 takes me way back to my childhood when I'd play online games before 2020 happened! It's still a pretty cool game, giving it at least four stars, but with all that lag and delay, it's super hard to play, and don't even get me started on the save issue. Now onto Page 2... Click your way through tons of familiar foes in this awesome RPG! It's a 2D pixel-art scroll-shooter inspired by retro games with awesome graphics and music. You'll blast rockets and fight zombies, guns, and voxels, but that's about it. Just run around, kill people, turn them into zombies too... Then there's this super-duper-mega-awesome-robotic-themed-turn-based-stealth-puzzle game that I guess is growing up. It's about adapting; you play as a dad looking for his lost daughter while using your sniper skills to shoot zombie menaces and protect humans. Want to play in the Monster League? Set your own goals, be rewarded, and solve puzzles in this platformer. As one story ends, another looms from not-so-distant shadows. This game was made with my kids for #oujevipo4kids: find cat, make squares touch each other, escape in Blocky's Escape - a fun puzzle game! Fun hardcore platformer in minimal style, and then there's Alone in the Madness (Part 01) where after a big accident, a virus takes over the city. You must escape to survive. WoofBro saves the princess with this nostalgic NES-style shooter like Contra. Fight heroes and minions in a bullet hell shooter. Get better with Bigger and better! Recruit your team and save the world in a dynamic platformer game with a fully destructible world. Get the mill of Rusty Lake running again, play satirical pinball, and try to get high scores in this simple yet entertaining shooting game where you have to be quick and alert! It's a challenging platformer with touchscreen support; defend your kingdom from orcs, knights, and skeletons. Be the greatest monster trainer in Monster Frontier, Chew bubblegum, kick ass in Escape from deadly traps, make kissing squares couple while avoiding walls, it's only one drink, upgrade yourself to stay sober as long as possible, and shoot rays of light between stars to build the twelve zodiac... Crumple: Episode 1 is an exciting puzzle-adventure game with elements of strategy. The main goal is to save Enve, but it involves navigating through various challenges. This includes solving logic puzzles related to circuits and helping characters in different scenarios. Players take on the role of Luka, guiding him to find Lara, escape from dangerous situations, and return to Earth safely. There's also a cute point-and-click game where players rescue the Grape Guardian in an arcade-style horizontal shooter. Other challenges include catching Pacman ghosts and navigating through hard tower climbers with surprising endings. The game offers over 60 missions, each with its own difficulty level, including special missions that allow players to earn new classes. There's also a feature for creating custom games where players can choose between AI bots or squad codes. The game has eight classes, along with over 100 perks/flaws/traits, making no hero the same. A unique aspect of the game is its day system, where heroes become tired or injured if they fight too many battles in a row. This means that strategy and timing are crucial to success. The game has a unique mechanic where heroes can be knocked down and lose stats, with critical instances resulting in significant stat loss. Each victory leads to a new day, allowing for hero healing and hiring new allies. Squad building and customization are key features, enabling players to swap heroes during battles and utilize free items and upgraded weapons. However, some users have experienced freezing issues at level 12, and others have noted compatibility problems with outdated Ruffle versions.
